

The Balsam Lake Protection and Rehabilitation District Board is pleased to announce that we have selected SOLitude Lake Management to complete the third of four planned alum treatments in the East Balsam Basin. A DNR grant will cover a portion of the cost.

SOLitude will begin treating East Balsam during the first week of June 2024. As in the past, they will treat approximately 300 acres, 10 ft and deeper as shown in the map. The entire application should take about 5 days, with the East Balsam Landing as the staging area.

Alum Application Schedule

- Mobilize equipment to the site: 6/3/24
- First day of application: 6/4/24
- Last day of application: 6/7/24
- Demobilize equipment from the site: 6/8/24

If you are on the water during the application, please help the SOLitude staff by staying clear of the alum barge to allow for an effective application. Also, please avoid the treated areas for at least 1 hour to allow the alum flock to float to the bottom. You may direct questions to our consultant at harmonyenv@amerytel.net.

Thank you,

Thomas Kelly, Chair
Balsam Lake Protection and Rehabilitation District
